

ERGOMAT®

The Ergomat Advantage

Advantages	ERGOMAT	Other Competitors
<p>Great Ergonomics With Unbeatable Durability</p>	<p>Ergomat mats provide the best ergonomic relief to workers. They are proven to help better the health of workers by stimulating blood circulation, preventing cramps, reducing tiredness and preventing industrial accidents. What does this mean for the employer? It reduces employee costs of absenteeism and sickness, while increasing productivity and profits.</p> <p>Ergomat mats have the best warranties on the market (up to 12-years!) because they are made of premium quality materials. Ergomat wet/chemical mats are made of virgin non-porous Nitril rubber. Ergomat dry/retail mats are made of durable expanded foam polyurethane.</p> <p>Many major car manufactures have used Ergomat mats down in their facilities for years. No replacement has been necessary due to their resilience to wear and tear, making Ergomat both the fiscally and environmentally responsible choice.</p>	<p>Quick loss of anti-fatigue properties</p> <p>Higher health and safety costs</p> <p>Sandwich mat foam layer compresses in high traffic areas creating trough</p> 
<p>Customized Solutions</p>	<p>Ergomat mats are available in many standard sizes and in customized widths, lengths and shapes to match the exact dimensions of a work area. Single piece mats prevents tripping hazards.</p> 	<p>Jigsaw puzzle interlocking assembly</p> <p>Overlapping / taped mats</p> <p>Matting pieces eventually do not fit together and create tripping hazards for workers</p>

ERGOMAT®

The Ergomat Advantage

Advantages	ERGOMAT	Other Competitors
<p>Matting for Controlled and Critical Environments</p>	<p>There are numerous Ergomat mats with different properties: ESD (anti-static), fire retardant, chemical resistant, anti-slip, cold insulated, autoclavable, shock-absorbent, etc. You can match an Ergomat to your specific environment needs to get the most out of it while getting unbelievable ergonomic relief.</p> <p>Currently offer more than 20 Cleanroom Approved Matting Options</p>	<p>No other matting company provides ergonomic matting engineered to meet the needs of specific work environments and industries.</p>
<p>All Sides Are Always Beveled</p>	<p>Ergomat mats have beveled edges on all sides to prevent trip hazards. Since the molded bevels are made of the same material as the rest of the mat, Ergomat mats don't swell or shrink and always remain flat against the ground.</p>	<p>Use two different materials that will react in opposite ways to weight being put on the mat. This will cause the edges to curl up. The curled and chipped edges create dangerous trip hazards.</p>

Ergomat is the industry leader in offering matting solutions for virtually every working environment. This is accomplished through our extensive innovative product offering of true ergonomic matting, virtually unlimited customization, premium virgin material, and superior warranties. Our Customer Service team is here to work with your Sales Team in determining the best matting solutions for your customers through product training and sampling programs, as well as assisting wherever necessary with specific customer requests.
